مقالات در همایش‌ها

Behzad Soleimani Neysiani, Fast language-independent correction of interconnected typos to finding longest terms, 24th International Conference of Information Technology (IVUS 2019), Kaunas, 2019 04 25.

Optimizing Multi Objective Based Workflow Scheduling, تهران, 2017 04 26.

A New Data-Intensive Task Scheduling in OptorSim, an Open Source Grid Simulator.Open Source Software Computing (OSSCOM), ۱۳۰۳. تبریز، Conference on

A Multi-Objective Optimization Model for Data-Intensive Workflow Scheduling in Data Grids. ۱۳۰۴ IEEE ۱۴th Conference on Local Computer Networks.Workshops (LCN Workshops). دبی، ۱۳۰۴.

Toward Extending Apache Thrift Open Source to Alleviate SOAP Service Consumption. ۱۳۰۵ International Conference on Open Source Software Computing. تبریز، Conference on

Utilizing Fuzzy Colored Petri-nets to Monitor Cardiac Pacemaker Behavior. ۱۳۰۶ IEEE ۱۱th International Conference on Application of Information and Communication Technologies (AICT). اصفهان، Conference on

A New Approach to Detecting and Preventing Worm Hole Attacks for Secure Routing in Mobile Ad-hoc Networks based on the SPR Protocol. ۱۳۰۷ IEEE ۱۰th International Conference on Application of Information and Communication Technologies (AICT). اصفهان، Conference on

A Cryptography Approach on Security Layer of Web Services. ۱۳۰۸ IEEE ۱۰th International Conference on Application of Information and Communication Technologies (AICT). اصفهان، Conference on

A New Approach to Detecting and Preventing Worm Hole Attacks for Secure Routing in Mobile Ad-hoc Networks based on the SPR Protocol. ۱۳۰۷ IEEE ۱۰th International Conference on Application of Information and Communication Technologies (AICT). اصفهان، Conference on

Runtime Verification of Pacemaker Using Fuzzy logic and Colored Petri-nets. ۱۳۰۹ ۷th Iranian Joint Congress on Fuzzy and Intelligent Systems.

Medical Software Assurance for Operational Performance. 2nd Conference, Tehran, 21-25 March 2015.

A model driven and clustering method for service identification, directed by metrics. SOFTWARE PRACT EXPER, 2020 10 20, SCOPUS, JCR.

References:

Optimal selection of VMs for resource task scheduling in geographically distributed clouds using fuzzy c-mean and MOLP.

Makespan reduction for dynamic workloads in cluster-based data grids using reinforcement-learning based scheduling.

Using a recurrent artificial neural network for dynamic self-adaptation of cluster-based web-server systems.

Optimizing Cost Function in Imperialist Competitive Algorithm for Path Coverage Problem in Software Testing.

An Innovative Model-Driven Slicing Approach for Testing.

A GA based method for search-space reduction of chess game-tree.

A method for the optimum selection of datacenters in geographically distributed clouds.

Web Service Protection Using a Cryptography Layer on WSDL.

Using a recurrent artificial neural network for dynamic self-adaptation of cluster-based web-server systems.

Optimizing Cost Function in Imperialist Competitive Algorithm for Path Coverage Problem in Software Testing.

Makespan reduction for dynamic workloads in cluster-based data grids using reinforcement-learning based scheduling.

Optimal Scheduling workflows in Cloud Computing.

Web Service Protection Using a Cryptography Layer on WSDL.

A class-based link prediction using Distance Dependent Optimizer.

A predictive framework for load balancing clustered web servers.

Evaluation of Classifiers in Software Fault-Proneness.

Indefinite block ciphering based on variable and great length key.

Runtime Verification of Pacemaker Functionality Using Hierarchical Fuzzy Colored Petri-nets.

Increasing the Life of Wireless Sensors.

A Distributed Method for Multiplication of Large Matrices using MSMQ Middleware.

A NEW SPARSE REPRESENTATION ALGORITHM FOR 3D HUMAN POSE ESTIMATION.

Predicting potential deadlocks in multithreaded programs.

Predicting potential deadlocks in multithreaded programs.

A Survey on Technical Methods for Analyzing and Predicting the Reliability of Large-Scale Distributed Systems.
